

THE AD HOC GROUP FOR MEDICAL RESEARCH

October 24, 2019

The Honorable Richard Shelby
Chair
Committee on Appropriations
U.S. Senate
Washington, DC 20510

The Honorable Patrick Leahy
Vice Chair
Committee on Appropriations
U.S. Senate
Washington, DC 20510

The Honorable Nita Lowey
Chair
Committee on Appropriations
U.S. House of Representatives
Washington, DC 20515

The Honorable Kay Granger
Ranking Member
Committee on Appropriations
U.S. House of Representatives
Washington, DC 20515

Dear Chairman Shelby, Chairwoman Lowey, Vice Chairman Leahy, and Ranking Member Granger:

As Congress works to complete the FY 2020 spending bills, the more than 300 undersigned organizations representing patients, scientists, health professionals, educators, academic and research institutions, and industry write to thank you for your longstanding leadership in support of the National Institutes of Health (NIH) and to encourage quick enactment of a Labor-HHS-Education appropriations bill that provides robust, sustained funding for medical research.

We are grateful that both the House-passed spending package and the draft bill released by the Senate Appropriations Committee on Sept. 18 would continue the momentum of recent years by providing NIH with a meaningful funding increase over the previous year. In particular, the \$42.1 billion proposed in the Senate bill would offer even greater opportunity to expand NIH's capacity to fund more promising research, provide support for the next generation of researchers, and allow the agency to address other critical needs.

Despite this strong bipartisan support for medical research, we are concerned that NIH is currently operating under a continuing resolution (CR), rather than under its final, full-year funding level. Aside from the budget implications, CRs create inefficiencies and uncertainty for both the agency and scientists across the country. Any further delay in finalizing FY 2020 funding levels – or, worse, reverting to a long-term stopgap that freezes funding at the levels in FY 2019 – would slow our progress toward cures and ultimately impede our ability to address major public health challenges.

To enable passage of a bipartisan spending package that maximizes investment in NIH, we strongly urge you to provide a meaningful increase in the allocation for Labor-HHS-Education appropriations and complete the spending bill as soon as possible. In passing the Bipartisan

Budget Act of 2019, Members of Congress recognized that our nation's defense and nondefense discretionary priorities could not be fully realized under the original Budget Control Act statutory caps. In light of the budget agreement that increased the non-defense discretionary caps by nearly \$25 billion over FY 2019, we believe that supporting NIH research as part of a thriving public health continuum should continue to be a top national priority. The allocation for the final FY 2020 Labor-HHS-Education spending bill should reflect that commitment.

Our nation's investment in medical research has resulted in better health and hope for patients everywhere. We look forward to working with you to continue this important legacy with quick enactment of a robust investment for NIH in FY 2020.

Sincerely,
